

THE ORIGINAL AND COMPLETE OFFSHORE RANGE

Our depth of knowledge and expertise in offshore lifting applications along with manufacturing partner McKinnon Chain has further strengthened the HA range of DNV (Revision 3) and API approved offshore master links

- 60% of the range gaining on average a 10% increase in their WLL, the maximum being 250t
- Sub-link sizes have been increased on a number of the quad assemblies
- The HA60ML and 70ML being replaced with the HA65ML and 75ML offering increased working load limits of 75t and 100t

“A great product alone does not guarantee success, which is why William Hackett Lifting Products prides itself on product availability to meet customer demand”
